First Office Action on the Merits

Election/Restrictions

1. Applicant's election with traverse of the Group defined on page 4 in the reply filed on December 27, 2004 is acknowledged. The traversal is on the ground(s) that the antioxidant linkers plus the -NO_2 group represents the technical features characterizing the compounds of the invention and that said group makes the obtained nitroxyderivatives efficacious and well tolerated for treatment of pathological conditions associated with oxidative stress and/or endothelial dysfunction. This is not found persuasive because the issue is not the problem solved by applicant but whether the claimed compounds contain a "*significant structural element qualifying as the special technical feature that defines a contribution over the prior art*". The antioxidant linkers defined by the claimed invention are structural different and, thus, said "antioxidant linkers plus the -NO_2 group" as suggested by applicant would result in compounds that are structurally different. Therefore, the claimed compounds do not contain a "*significant structural element qualifying as the special technical feature that defines a contribution over the prior art*".

The requirement is still deemed proper and is therefore made **FINAL**.

2. In the present application, the instant claims will be examined to the extent they read on the group defined on page 4 of the reply filed on December 27, 2004 wherein A

Art Unit: 1616

and B are selected from anti-inflammatory drugs and amino acids, respectively, defined by claim 11.

Double Patenting

3. Claim 12 is objected to under 37 CFR 1.75 as being a substantial duplicate of claim 11. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

Note: The recitation that the compounds are for use as medicament does not limit the scope of the compounds because the present specification discloses the use of the entire scope of compounds of claim 11 as medicaments.

Claim Rejections - 35 USC § 101

4. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

5. Claim 13 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The instant claim recites “[u]se of compounds or salts according to claim 11...”. A use is not patentable under 35 USC 101.

Art Unit: 1616

Claim Rejections - 35 USC § 112

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 11-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The language of the instant claims is indefinite. For example, it is unclear whether the recited (a) anti-inflammatory drugs define A or Z and (b) amino acids define T_B and T_{B1} or B. Based on the present specification and applicant's elected Group, it is assumed said groups define A and B, respectively.

Other Matters

8. It is suggested that (a) the instant claims be limited to the elected group defined in the reply December 27, 2005 and (b) the definition of R' in claim 11 be rewritten to read "R' is linear or branched C₁ to C₂₀ alkyl".
